| Monday,05 Oct,2026 | VLSFO | 719 | 881 | 714 | 859 | 743 | 777 | 975 |
| | LSMGO | 1470 | 1279 | 1454 | 1506 | 1371 | 1627 | 1665 |

## Top stories of the week

- The US has suspended sanctions on Russian diesel for six months after Donald Trump said Vladimir Putin had agreed to release up to 4.8 million tons onto the world market. OFAC's General License 135, issued Friday, authorizes the sale, delivery, offloading and importation of Russian-origin diesel, including into the US, until April 7, 2027. Trump said Moscow would supply 300,000 tons immediately, 500,000 tons in November and a further 1 million tons thereafter, with 3 million more to follow depending on refinery conditions. Russia has banned diesel exports since July 8 after Ukrainian drone strikes cut refinery output. US pump diesel recently hit a record $6.53 a gallon, while New York wholesale fell about 4.5% to $4.67 on the news; New York LSMGO has eased into the low $1,500s/mt. EU and UK import bans and the $100/bbl product price cap remain fully in force, and the 2022 Ending Importation of Russian Oil Act stands, with the license treated as a temporary executive waiver.
- Separately, implied bunker demand from ships under IMO reporting rules was flat at about 246.1 million mt in 2025, up 0.2%, even as reported consumption fell 1.2% to 220.8 million mt and tonnage coverage slipped to 89.7% from 91.0%.

## OVERVIEW

This report contains the parameters of fuel prices, and is intended to provide information regarding the two primary used fuels in marine fuel bunkering tasks. The prices presented in this weekly report reflects the most strategic areas and hot spots that acts as a guiding line for the fuel prices all over the world.
